## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claim s 2-15, 18, 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mitsubishi Chemical Company EP 0 728 811, in view of Bodiger 5,849,827.
3. The rejection, as elucidated in Paper #9 is maintained in its entirety. The rejection elucidated in Paper #6 however, is withdrawn.

### ***Response to Arguments***

4. Applicants' arguments filed 10/07/02 have been fully considered but they are not persuasive. Whether Mitsubishi teaches away from the use of phosphorus containing flame-retardants, which are not phosphazanes is immaterial. Bodiger et al. name as preferred flame-retardants "all phosphorus compounds conventionally used", (column 8, lines 21-22), which definition definitely includes phosphazanes. The fact that the reference does not specifically names phosphazanes, does not mean that they are not included in the phrase "all phosphorus compounds". Since the finely divided filler improves the flame retardance of all phosphorus compounds, its inclusion into the flame retardant composition of Mitsubishi would have been obvious to one having ordinary skill in the art. Furthermore, "consisting essentially of" does not exclude the presence of other flame-retardants, unless they interfere with the invention. "Consisting essentially of" is not "consisting of".
